Alarming new official data from the UK government shows that England has suffered a staggering one million deaths from Covid mRNA vaccines in just two years.

The vaccinated population in England has suffered an excessive number of deaths compared to the unvaccinated population.

According to the UK Government department known as the UK Health Agency (UKHSA), by 3rd July 2022, 18.9 million people had refused the first dose of the COVID-19 injection, 21.5 million people had refused the 2nd dose of the COVID-19 injection, alongside 2.6 million people who had received the first dose but refused the second, and 30.4 million people had refused the third dose of the Covid-19 injection alongside 8.9 million people who had received the second dose but refused the third.

According to the UKHSA's figures, 63.4 million people were eligible for vaccination at this point.T

Therefore, 18.9 million people refused the COVID-19 vaccine in England and remained completely unvaccinated.

But on top of this, a further 2.6 million refused a second dose, meaning 21.5 million people were **not** double vaccinated, and 8.9 million people refused a third dose, meaning 30.4 million people were **not** triple vaccinated.

In July 2022, thirty per cent of the population of England remained completely unvaccinated. 34% of the population of England were **not** double vaccinated, and 50% of the population were **not** triple vaccinated.

However, as is shown in the following chart, the vaccinated population as a whole accounted for 95% of all COVID-19 deaths between January and May 2023, while the unvaccinated population accounted for just 5%.

But it's the fact that these deaths aren't among the one-dose and two-dose vaccinated population that is truly horrifying.

The vast majority are among the 4x vaccinated, with this population accounting for 80% of all COVID-19 deaths, and 83% of all COVID-19 deaths among the vaccinated.

So with that being said, the following figures published by the Office for National Statistics (ONS) in their 'Deaths by Vaccination Status' dataset, which can be found on the ONS website [here](#), or downloaded [here](#) make for even more horrifying reading.

Between April and May 2023, the highest number of unvaccinated all-cause deaths occurred among 70 to 79-year-olds in May 2023 with 405 deaths.

At the same time, the highest number of vaccinated all-cause deaths occurred among 80 to 89-year-olds in April 2023 with a shocking 13,713 deaths.

What's extremely concerning about these official figures is that the vaccinated surpass the unvaccinated by far in terms of death in every single age group since July 2021, despite the fact 30% of the population have not even had a COVID-19 injection.

So much so, that there were 965,609 deaths among the vaccinated compared to just 60,903 deaths among the unvaccinated between July 2021 and May 2023.

This means there was a grand total of 1,026,512 deaths in England during this period and the vaccinated accounted for 94% of them, whereas the unvaccinated accounted for just 6% of them.

This more suggests that the Covid-19 injections are deadly, and prove that they are killing people.

And we can be certain that COVID-19 Vaccination greatly increases mortality.

I remember Sue Lawley being sacked for an over enthusiastic interview she conducted with Maggie Thatcher re the Belgrano sinking etc. I remember Thames Television losing it's broadcasting licence, for screening Death on The Rock re the SAS killing IRA suspects in cold blood in Gibraltar. Today Katy Hopkins claimed that the Broadcasting authority is gunning for GB news re it's Rishi rat grilling re vaccine damage. The BBC has a known liar as it's disinfo fact checker, Mariana I fibbed a bit to get the Job.

What are the chances that this vaccine damage info will be screened in an honest fashion on UK TV. ?
